BONSAL AMERICAN, INC.
an Oldcastle® company

The GemSeal® DIFFERENCE

Why have contractors throughout the US preferred GemSeal pavement maintenance products for the past 50 years? Because they can help you perform at your best, with results you and your demanding customers can be proud of. Every gallon of GemSeal FedSpec sealer is certified and tested to meet or exceed federal specification ASTM D5727 (formerly RP-355e), ensuring proper solids, ash content and viscosity for a job well done.

GemSeal's Guardian AE sealers provide contractors another high quality sealer option in those markets that prefer asphalt emulsion sealers.

Only GemSeal offers **POLYTAR**, with a 25-year track record in the field, as the longest lasting asphalt pavement coating available in the market today. Polytar is just one example of the GemSeal **DIFFERENCE** in offering high quality, innovative products at a superior value.

QUALITY - included in every gallon

GemSeal brand sealers use only tested and certified raw materials in a sophisticated colloid milling process to produce the most consistent sealer for an even application. Our rigorous quality control program ensures every gallon of sealer meets the highest standards to eliminate call backs and costly reapplications contractors often experience with lower quality products. GemSeal has you covered with high quality, high performance products, so you can be proud of every job.

INTEGRITY - a name you can TRUST

Sealcoat contractors know they can trust Bonsal American GemSeal to provide great products and service that meet their expectations. We pride ourselves on quality engineered pavement sealers, on-time delivery, and exceptional service. We know you have other choices and realize we must *earn* your business with every load.

SERVICE - meeting DEMANDING EXPECTATIONS

Saturday deliveries? With the largest tanker delivery fleet in the industry, you got it. Tight deadline? Using our high speed colloid mill manufacturing process and large storage capacity, we've got you covered. Need a consistent trouble-free sealer to reduce downtime? With our quality control program, no need to worry. Have questions about equipment or application? We have an expert sales and technical team to make you successful, including advice and sale of crack fillers, latex additives, and tools.

GemSeal PRIDE - our DEPENDABILITY & CONSISTENCY enhance your reputation

GemSeal products were perfected over more than 50 years of manufacturing and testing experience. Proprietary processes, industry-leading quality control program & ongoing research/development make GemSeal the leader in the sealer industry.

GemSeal is the oldest sealer brand in continuous existence, with a dedicated focus on the sealcoating industry. The first choice of contractors large & small, GemSeal is simply the best choice for those whose reputations depend on the quality of the sealer they use.

As the market leader in pavement coatings for over 50 years, GemSeal offers:

- Outstanding Quality
- Superior Value
- Reliable Delivery
- Product Availability

Pavement Sealers

Available in bulk tanker up to 5,000 gallons and 55 gallon drums

Poly-Tar®

High performance coal tar emulsion sealer

- Longest life of any seal coating product
- Polymerized for maximum resistance to wear, improved fuel resistance, and stronger adhesion
- Ideal for high traffic parking lots and driveways, airport ramps, aprons and taxiways
- No additional modifiers or latex additives required

Fed Spec/Fed Spec HS

Premium coal tar emulsion sealer concentrate for commercial applications

- Excellent durability that dries to a rich, jet black finish
- Extends the service life of asphalt pavement
- Protects asphalt from destructive elements such as oil & gas
- Meets or exceeds requirements for Fed. Spec. R-P-355e, ASTM D 5727, & FAA P-625, P-627, P-630 and P-631

Guardian AE

Premium asphalt emulsion sealer concentrate for commercial applications

- Highly durable protective coating, proprietary resin base
- Maintains a rich black appearance
- Polymeric formula enhances adhesion and durability

Pro-Blend

Polymerized blend of coal tar and asphalt emulsion sealer concentrate for commercial applications

- Highly durable protective coating and low odor formula
- Maintains a rich black appearance
- Polymeric formula enhances adhesion and durability
- Proprietary resin base for added strength

Sand Mix

Fed Spec concentrate sealer with pre-blended additives and sand

- No other additives required
- Unique formulation for New England market

Additives for Pavement Sealers

Available 5 gallon pails and 55 gallon drums

Ultra 3 **New and Improved**

- Resists high pavement temperatures
- Improves strength and durability
- Increases viscosity, improves adhesion and reduces power steering marks

AQS 3 **New and Improved**

- Improves drying time
- Sealer dries blacker with improved strength and durability
- Reduces power steering marks and improves sealer adhesion

Latex Modifier

- Improves strength and durability
- Increases viscosity, improves adhesion and reduces power steering marks
- Decreases drying time

Rapid Set

- Used to decrease dry time
- Superior performance modifier for coal tar and asphalt based sealers
- Sealer dries blacker with improved strength and durability
- Reduces power steering marks and improves sealer adhesion

Tarmax

- Concentrated viscosity modifier
- Improves sealer adhesion
- Meets FAA P625-P627

Primers

Available in 5 gallon pails, 55 gallon and bulk

TarPrime

- Used for priming difficult-to-seal pavement surfaces such as oil spots, weathered asphalt and polished aggregates

Tarloc MPC

- Multi-purpose primer
- Excellent for use on badly oxidized pavements and polished aggregates

Tack Coat

- Asphalt emulsion tack coat for improved adhesion
- Used for patching and asphalt overlays

Traffic Marking Paints

Available in 5 gallon pails

Latex Traffic Marking Paint

- Durable latex paint designed for freshly seal-coated surfaces or new asphalt
- 20 minute drying time
- Available in yellow, white and blue
- Meets Federal specification TTP 1952B

Fast Dry Latex Marking Paint

- Fast drying acrylic latex paint designed for freshly seal-coated surfaces, new asphalt and restriping
- Added resin for durability and wear
- 10 minute drying time
- Available in yellow and white
- Meets Federal specification TTP 1952D, Type 1

Crack Filling Materials

Trowelable Crack Filler

- Thick mastic compound for depressions in asphalt surfaces
- Used to fill cracks up to 1" wide
- Doubles as a patching material
- Available in 5 gallon pails

Cold Pour Crack Fillers

- Pourable Crack Filler
- Super Flex

Hot Pour Crack Fillers

Available in 55 lb. or 30 lb. boxes

- W.R. Meadows Hi-Spec (ASTM 3405)
- W.R. Meadows #164 (ASTM 164)
- W.R. Meadows 3405 (ASTM 3405)
- Deery 102P (ASTM 3405)
- Deery Super Stretch (Direct Flame)
- Deery PLS (Parking Lot Sealant)

Patching & Miscellaneous

SAKRETE® US Cold Patch **NEW!**

- Available in 50 lb. bags
- Revolutionary product that out performs conventional cold patch
- Sets faster and eliminates rework to save you money

SAKRETE® Blacktop Patch

- Available in 60 lb. bags

BLACK AND INDUSTRIAL SANDS

HAND TOOLS

Professional quality brooms, brushes & squeegees for prep work & sealer application

EQUIPMENT & ANCILLARY ITEMS

A variety of blowers, strippers, stencils, signs and posts
